

Business & Consumer appends

How much do you know about your customers... especially your best customers?

You probably already have a database of your customers and prospects. But, are you using it wisely? To target your best customers effectively and efficiently, you need a deeper understanding of who they are, where they live, what they do, what they like and dislike, and so on. You need a profile... a set of characteristics that helps identify and group your target audience. Of course, you don't have to profile to send direct mail, but it will improve your results. And isn't that what direct marketing is all about?

- Visualize the people you want to reach
- Fine-tune your offer to a well-defined audience
- Create more appropriate and more effective mailings
- Increase lead quality and response rates
- Acquire additional records to add to your house list

Business & Consumer Phone Append

List Hygiene... at your service

Don't lose contact due to outdated addresses. Update records before you mail!

The addresses in your database are your gateway to accurate data appends, merge/purge, analytics, and ultimately, successful direct marketing campaigns that yield the greatest ROI. Capturing accurate data at the front end isn't always possible, but cleaning it up and maintaining it after you've collected the data is as easy, as it is imperative, to the success of your direct mail and data management initiatives.
